BIM: THE FUTURE OF CONSTRUCTION

OUR MISSION:

- To revolutionize the construction industry through the integration of BIM into companies and projects
- To support professionals in achieving greater efficiency, sustainability, and customer value

SERVICES & BENEFITS:

- Cross-industry consulting and project support using Building Information Modeling (BIM)
- Cost savings and improved collaboration
- Greater precision and early error detection during the construction process
- Optimized building maintenance

WHY BIM? ADVANTAGES OF BIM

IDENTIFYING OPPORTUNITIES FOR OPTIMISATION THROUGH BIM

The construction industry is hardly digitized. Modern methods enable the early detection of planning errors, thereby minimizing costs and delays. Efficient interface management ensures that projects run smoothly.

DIGITAL TRANSFORMATION THROUGH THE HOLISTIC INTEGRATION OF BUILDING DATA, IN LINE WITH THE BIM METHOD

Our method ensures planning reliability, efficient collaboration, and cost transparency throughout the entire project.

WHO NEEDS BIM?

We support building owners, design firms, construction companies, and property management companies on their individual BIM journeys.

BIM-COORDINATION

Our comprehensive BIM coordination service supports your construction projects from the planning stage right through to completion using a shared digital model. We ensure seamless collaboration and communication between all parties involved. Using modern BIM methods, we optimise the building's life cycle, minimise risks, reduce errors and ensure that the project is completed on time and cost-effectively.

Project Details:

- **Building Category:** Logistics Center, New Construction
- **Project Value:** approx. €150 million
- **Gross Floor Area:** approx. 190,000 m²
- **Duration:** since December 2022
- **Business Area:** Overall BIM Coordination
