BIM: THE FUTURE OF CONSTRUCTION

OUR MISSION:

- To revolutionize the construction industry through the integration of BIM into companies and projects
- To support professionals in achieving greater efficiency, sustainability, and customer value

SERVICES & BENEFITS:

- Cross-industry consulting and project support using Building Information Modeling (BIM)
- Cost savings and improved collaboration
- Greater precision and early error detection during the construction process
- Optimized building maintenance

WHY BIM? ADVANTAGES OF BIM

IDENTIFYING OPPORTUNITIES FOR OPTIMISATION THROUGH BIM

The construction industry is hardly digitized. Modern methods enable the early detection of planning errors, thereby minimizing costs and delays. Efficient interface management ensures that projects run smoothly.

DIGITAL TRANSFORMATION THROUGH THE HOLISTIC INTEGRATION OF BUILDING DATA, IN LINE WITH THE BIM METHOD

Our method ensures planning reliability, efficient collaboration, and cost transparency throughout the entire project.

WHO NEEDS BIM?

We support building owners, design firms, construction companies, and property management companies on their individual BIM journeys.

BIM-SCAN

With our BIM scan, we offer comprehensive solutions for the digitisation of existing buildings and the monitoring of construction processes. Using state-of-the-art laser scanning technologies, we digitally capture existing buildings and make the data available for efficient use. In this way, we support revitalisation and refurbishment projects, target-actual comparisons and schedule monitoring during the construction phase. We also facilitate the creation of digital twins for efficient facility management and optimised operational management.

Project Details:

- **Building Category:** Logistics Center. New Construction
- **Gross Floor Area:** approx. 40,000 m²
- **Duration:** October 2023 – December 2023
- **Business Areas:** BIM Scanning, BIM Management
